B-91 N.F.L Vijaipur Township, Guna, M.P, 473111

Profile

Motivated B.Tech student specializing in Mathematics & Data Science with strong programming skills in Python, C++, and Java, proficient in data structures, algorithms, and object-oriented programming. Passionate about building scalable software solutions and solving complex problems through effective collaboration.

Technical Skills and Interests

Languages: Python, C++, Java, SQL, JavaScript, HTML, CSS, C (Basic), R (Basic)

Frameworks/Libraries: Flask, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Tools: Git, MySQL, Power BI, Excel, VS Code

Core CS Concepts: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

Soft Skills: Problem Solving, Teamwork, Communication

Education

- **Maulana Azad National Institute of Technology, Bhopal** *Expected 2026*
  B.Tech in Mathematics & Data Science CGPA: 7.21

Experience

- **Bhabha Atomic Research Centre (BARC)** *Mumbai*
  Practical Training Intern May 2025 – July 2025
  - Developed a scalable NLP data pipeline to ingest, transform, and analyze scanned question papers for topic classification, difficulty scoring, and semantic similarity detection.
  - **Tools & Technologies:** Python, Flask, SQLAlchemy, PyTesseract, TF-IDF, Regex, Logistic regression, Sentence Transformers, Cosine Similarity, HTML/CSS

Personal Projects

- **Fraud Detection System (URL & QR Code Analysis):**
  – **Tools:** Python (Flask, Scikit-learn, OpenCV, Pandas), JavaScript, HTML/CSS
  – Developed a real-time fraud detection system that analyzes URLs and QR codes, improves phishing detection accuracy, and enables risk scoring and history tracking.
- **Banking Data Pipeline and Insights Dashboard:**
  – **Tools:** Python, Pandas, NumPy, Seaborn, Matplotlib, Power BI, MySQL
  – Built a data pipeline and an interactive dashboard that analyzes banking data from 3,000+ customers, improving reporting efficiency and enabling clear risk segmentation.
- **Real-Time Twitter Sentiment Analysis with Python & Tweepy:**
  – **Tools:** Python, Tweepy, TextBlob, VaderSentiment, Pandas, Matplotlib, Seaborn
  – Built a system streaming 1000+ live tweets per hour by keyword, preprocessing and classifying sentiment with over 85% accuracy, and visualizing sentiment trends to monitor public opinion and brand reputation in real time.

Positions of Responsibility

- **Under Officer – National Cadet Corps (NCC)** *2022 – 2025*
  - Led squad activities, supervised training drills, and coordinated ceremonial parades.
  - Mentored junior cadets and managed unit-level responsibilities to promote discipline and teamwork.

Certifications

- **BCG X – Data Science Job Simulation (Forage)**
- **Tata iQ – GenAI-Powered Data Analytics Simulation (Forage)**
